Appendix no. 3 Principles of use of a standard PRM3G Bike with child seat

1. The maximum load of a bike equipped in child restraint designated for use cannot exceed 114 kg.
2. Use of Bikes equipped in child seat is possible only under the supervision of a legal guardian of a child, who possesses an account in the PRM System. Legal guardians are obliged to properly secure a child in the child seat in accordance with the instruction for use placed on the child seat.
3. In case of any doubts as to the manner in which a child is to be secured in the seat, the User of PRM System ought to contact the CC by phone.
4. Bikes equipped in a child restraint system are designated for carrying children with body weight from 9 to 22 kg, which are capable of sitting without anyone's assistance for a longer period of time, as a minimum the time of an intended bike ride.
5. Prior to placing a child in the seat one must ensure that the seat, the holding down device of the bike and the elements which restrain, designated to ensure a child's safety for the duration of the ride are not damaged, bearing traces of damages, nor are they too loose and that they are solidly mounted within the bike. It is recommended also to control the seat temperature (whether it is not excessive, i.e. Due to direct sun exposure). In case of observing any irregularities and, in particular, in case of noting defectiveness of the seat or of its assembly to the bike, the User of PRM System ought to inform the Operator immediately by means of CC, and the use of such seat is prohibited.
6. Legal guardian takes full responsibility for a child during a rental of bikes with child restraint system.
7. Children should be wearing adequate protection helmets during rides (these do not form part of standard Bike equipment) One ought to remember that children should be equipped in adequate clothing, securing them against weather conditions, i.e. rain or sunlight.
8. A child should be placed in a seat in a manner which guarantees optimal comfort and safety during the ride, by means of a restraining system which ensures that child's moves are restrained within the seat. It is recommended that the back plate is slightly inclined backwards.
9. The user is obliged to ensure that the carried child is secured in a way that prevents it from falling out during the ride. If an accident occurs due to inappropriate use of the restraining mechanism, the Client bears responsibility for.
10. Prior to commencing the ride one must ensure that:

- a. There is no possibility for any part of a child's body, clothing or protection elements to enter into contact with the moving element of the seat or the bike.
 - b. Additional load of the bike does not negatively impact its manoeuvrability or balance necessary for safe travelling by bike;
 - c. Mass and body dimensions of a child do not exceed the maximum load of the seat (the above must be controlled also during the ride).
11. Making any modifications whatsoever to the seat or mounting additional luggage to the place in which the seat with a child is located is forbidden. One must maintain special caution during a ride by bike with a child placed in the seat, bearing in mind that the bike may react differently in terms of maintaining balance, steering and braking. In particular, one may adjust the speed of the ride to the restraints stemming from travelling with additionally burdened bike.
 12. Throughout the use of a bike one must verify on an ongoing basis whether the rack with a mounted seat functions correctly and, furthermore, whether the carried child does not obscure in any way the reflections placed on the rack/the bike.
 13. One must also pay special attention not to leave the biked parked with a child in the seat unattended.
 14. Rental and Return of a Bike with child seat is possible from every station.
